### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

#### **LISTING OF CLAIMS:**

1. (currently amended): A light guide panel of an edge-light type backlight system comprising:

a light incident part into which light enters from a point light source; and

a light emitting surface from which light is emitted,

wherein the light incident part comprises:

a light incident surface on which a prism pattern is formed, the light incident surface facing the point light source; and

first and second surfaces extending from the light incident surface in a direction in which light travels and adapted to reflect light passing through the light incident surface to reduce a direction angle, the first and second surfaces being opposite to each other with respect to an optical axis,

wherein the prism pattern has a horizontal section in the shape of ~~triangles~~ triangles, and

wherein a relationship between an apex angle of the prism pattern and a half-maximum angle satisfies the following formula:

$$C_3 \geq (90 - \alpha) \times 2,$$
